Data sheet:
WL-549 IT

Product code : WL-549 IT
Product name : Wireless Network ADSL2+ Modem Router w/splitter 54g + USB dongle
EAN code : 8716502017836

Simply connect this ADSL 2+ Modem Router to your ADSL line, and right away you'll have a base station for an entire wireless home network, as well as being able to take maximum advantage of the benefits of broad-band Internet via ADSL. The Modem Router has a built-in ADSL 2+ modem, so you'll already be fully prepared for the newest developments in the world of Internet. The Router function enables all the users in your network to access the Internet through 1 subscription. You needn't be worried about the communication speed across your wireless network; the Modem Router works according to the 802.11g standard, and guarantees you an actual throughput rate of a staggering 24 Mbps.

The package also contains a ADSL 2+ splitter, to split your telephone line between your ADSL modem and your normal phone line.
